Christmas Card Back Templates

These templates are provided by PhotographyPla.net and are intended to be used to create backs of two-sided Christmas cards. We have a variety of photo overlays that can be used with your own photos to easily create your own Christmas cards, and we wanted to also provide these templates to make it easy to create your own two sided cards.

This pack includes a total of 16 templates. There are 3 unique designs, and 1 of them comes in 2 different color schemes. Each of those 4 designs comes in a small and a large size. And each of those 8 designs comes in both horizontal and vertical orientations. The card sizes are based on the printing specs of Bay Photo Lab. You can, of course, use whatever printer or lab you prefer, but please be sure to check their instructions and specs first as the templates may need some adjustments. The large templates in this set are sized for 5 x 7 inch prints, and the small templates are for 4 x 5.5 inch prints.

Our products that can be used to create Christmas cards using your photos:
- Christmas Badge Overlays
- Christmas Shape Overlays
